

Delta Element Steam Traps

Models: M25, GM25

CRN: Canadian Registration Number Available

FOR PROCESS AND HEATING SYSTEMS

3 Year No Live Steam Loss Guarantee

A series of high pressure, compact, high capacity steam traps developed to handle the varying loads typical of process and heating applications.

- **Maximum differential pressure:** 320 psi (22,1 bar)
- **Single blade element** – offers long-term, trouble-free service because it's not prone to dirt build-up as encountered with many other bimetal designs
- **Easy maintenance** – traps are in-line repairable when isolated from live steam system and can be up and running again in minutes
- **Stainless Steel internals** – leads to longer service life since materials are highly resistant to fatigue and corrosion
- **Modulating discharge** – automatically adjusts to operating pressure and load
- **Integral strainer and check valve** – strainer protects trap from dirt while check valve prevents backflow during shutdown
- **Continuous air and CO2 venting** – maximizes heat transfer while minimizing corrosion
